### Zoo & Wildlife Biology Major (B.S.)

#### Purpose

The purpose of the Zoo and Wildlife Biology major is to continue to broaden our offerings to students interested in being stewards of God’s creation. Zoos are heavily involved in conservation efforts associated with endangered species and students will be equipped to secure jobs in zoos to assist these types of efforts. Similarly, rehabilitation centers are involved in stewardship issues by returning injured animals back into the wild. Students who are interested in science and have a passion for outdoors will also be interested in this major which will equip them for wildlife management graduate programs in natural resources.

#### Program Learning Outcomes

The student will be able to:

1. Apply standards and principles of safe practice in the laboratory or field environment.
2. Understand ethical issues in the life sciences in light of a biblical/Christian worldview.
3. Demonstrate knowledge of fundamental concepts in Zoo and Wildlife Biology.
4. Conduct, analyze, and summarize research related to vertebrate wildlife.

Program of Study

Delivery Format: Residential Only

- Zoo & Wildlife Biology (B.S.) - Resident (p. 876)

Career Opportunities

- Animal Care Specialist
- Conservation Officer
- Park Naturalist
- Wildlife Biologist
- Zoo Curator
- Zoo Keeper

Courses

BIOL 101 Principles of Biology 3 Credit Hours
An examination of the fundamental characteristics common among living things. Emphasis is placed upon studies of the cell, energy, metabolism, reproduction, heredity, ecology, phylogeny and the diversity of life.

BIOL 102 Principles of Human Biology 3 Credit Hours
An examination of structure, function, development and homeostatic interaction in higher organisms with special emphasis on human body systems.

BIOL 103 Principles of Biology Laboratory 1 Credit Hour
Prerequisites: BIOL 101
Laboratory exercises selected to demonstrate basic biological concepts. Emphasis is on plant and animal cell chemistry, composition and function, organismal structure and function, biological diversity and population ecology.

BIOL 104 Principles of Human Biology Laboratory 1 Credit Hour
Prerequisites: BIOL 102
Laboratory exercises selected to demonstrate basic biological concepts. Emphasis is placed on structure and function in higher organisms, development, behavior, parasitism, and the history of life.

Offered: Resident

BIOL 110 General Biology 4 Credit Hours

BIOL 203 Introductory Microbiology 4 Credit Hours
Prerequisites: HLTH 202 or HLTH 222 or BIOL 212 or (BIOL 215 and BIOL 216)
An examination of the fundamental principles of microscopic organisms. Microorganisms are examined with regard to cell structure, metabolism, heredity, diversity and taxonomy. The basic concept of genetic engineering, pathogenicity, human disease, and immunology are presented.

Registration Restrictions: Restricted to Family and Consumer Sciences and health-related majors.

Offered: Resident

BIOL 203L Introductory Microbiology Lab 0 Credit Hours
Prerequisites: BIOL 203 (may be taken concurrently)

Offered: Resident

BIOL 204 Microbiology for Nursing Professionals 4 Credit Hours
Prerequisites: BIOL 215 and BIOL 216
An examination of the fundamental principles of microscopic organisms. Microorganisms are examined with regard to cell structure, growth, heredity, diversity, and epidemiology. The basic concepts of pathogenicity, immunology, human disease, and genetic engineering are presented.

Registration Restrictions: Restricted to online students with an RN license pursuing a BSN.

BIOL 213 Human Anatomy and Physiology I 3 Credit Hours
A study of the structure and function of the human body with emphasis on cells, tissues, skin, nerves and special senses, muscle bones, and coordination and control of body movements. Concepts in physiology, including the maintenance of homeostasis, will be discussed. (Formerly BIOL 211 lecture)

Note: May not be used for general education credit except in conjunction with BIOL 215.

Offered: Resident

BIOL 214 Human Anatomy and Physiology I Lab 1 Credit Hour
Prerequisites: (BIOL 213 or BIOL 313
Laboratory exercises selected to demonstrate principles of human anatomy and physiology. Emphasis is placed on foundational concepts such as homeostasis, anatomical terminology, the chemistry of living things and the structure and function of cells and tissues. The integumentary, skeletal, muscular and nervous body systems are examined via hands-on exercises and dissection of preserved specimens. (Formerly BIOL 211 Lab)

Offered: Resident

BIOL 305 Parasitology  
4 Credit Hours

Prerequisites: BIOL 225

A study of major protozoan, helminth, and insect parasites, dealing with their form, function, life cycle, pathology, epidemiology, classification, geographical distribution, treatment and control.

Offered: Resident

BIOL 307 Plant Physiology  
4 Credit Hours

Prerequisites: BIOL 225 and CHEM 301

A study of the biochemical and biophysical processes of plants. Emphasis is given to plant-soil water and mineral relations, nutrient cycling, photosynthesis and carbon metabolism, and plant growth and development.

Offered: Resident

BIOL 310 Ecology  
4 Credit Hours

Prerequisites: (BIOL 208 or BIOL 225) and (MATH 201 or MATH 211 or BUSI 230)

An examination of the interrelationships between organisms and biotic and abiotic factors in their environment. The emphasis of the lab is the collection and statistical analysis of quantitative ecological data.

Registration Restrictions: Junior or Senior status

Note: Offered fall semester.

Offered: Resident

BIOL 313 Clinical Human Anatomy  
3 Credit Hours

Prerequisites: BIOL 225

This lecture course examines the structures of the human body using both systemic and regional approaches with emphasis on clinical applications and common pathologies. Special attention is placed on gross anatomy that is important in general practice, emergency medicine and surgery while demonstrating anatomy's relationship to physical examination and diagnosis. An overview of the body systems is followed by a special focus on the thoracic, abdominal, pelvic and lower limb regions.

Offered: Resident

BIOL 316 Human Biological Variation  
3 Credit Hours

Prerequisites: BIOL 215 or BIOL 313

This course examines the anatomical, genetic, and behavioural characteristics that both unite mankind and distinguish humans from apes and other animals. Biological variation in modern and ancient man will be explored.

Offered: Resident

BIOL 317 Botany  
4 Credit Hours

Prerequisites: BIOL 224

A survey of the Fungi, Protista, and Plantae kingdoms with an emphasis on the morphology, physiology, anatomy, taxonomy, ecology, reproduction, and phylogeny of plants. The lab includes collection and analysis of experimental data on plants both in the lab and field. (Formerly BIOL 207)

Offered: Resident

BIOL 320 Introduction to Entomology  
4 Credit Hours

Prerequisites: BIOL 208 or BIOL 225 or BIOL 212 or (BIOL 215 and BIOL 216)

An introduction to the study of insects including structure, physiology, life histories, ecology and taxonomy with a special emphasis on those insects of medical and economic importance.

Offered: Resident

BIOL 321 Comparative Anatomy of the Vertebrates  
4 Credit Hours

Prerequisites: BIOL 208 or BIOL 212 or BIOL 225 or (BIOL 215 and BIOL 216)

A comparative study of the structure and relationships of vertebrate animals.

Offered: Resident

BIOL 330 Histology  
4 Credit Hours

Prerequisites: BIOL 225 or (BIOL 215 and BIOL 216)

A study of the micro-structure and function of the human body with emphasis on biochemistry, cell physiology, and organismal pathology.

Offered: Resident

BIOL 361 Forensic DNA Analysis  
3 Credit Hours

Prerequisites: CJUS 200 or BIOL 225 or CHEM 122

An introductory course designed to provide the student with an understanding of the general principles and methodologies used in forensic DNA profiling (or typing). Topics covered include the historical development of DNA profiling methods, alternative procedures employed in forensic laboratories, current DNA typing techniques, and the ongoing development of new forensic DNA typing methods. Students will learn to present forensic DNA evidence in a mock trial. The mock trial, complete with a judge, a counsel for the prosecution and for the defense, and a jury, challenges the students both scientifically and legally in a simulated courtroom setting.

Offered: Resident
BIOL 371 Vertebrate Paleontology  
3 Credit Hours

Prerequisites: BIOL 208 or BIOL 212 or (BIOL 215 and BIOL 216) or BIOL 225

BIOL 371 - Vertebrate Paleontology (3 hours) Prerequisite: BIOL 208 "C" or better; or BIOL 225 "C" or better; or BIOL 215/216 "C" or better. A study of vertebrate paleontology, including its methodology and a survey of major vertebrate fossil groups. Intended for upper-level Biology majors.

Offered: Resident

BIOL 385 Advanced Human Physiology  
3 Credit Hours

Prerequisites: BIOL 225

Human physiology is the study of the functions of the body and how it maintains homeostasis. This lecture course examines those functions from a cellular and molecular basis using a systemic approach. Special attention is placed on medically vital systems including the nervous, cardiovascular, respiratory, digestive and endocrine systems. The course will be of use and interest to students intending to go to medical school or other health-related fields.

Offered: Resident

BIOL 399 Laboratory Assisting  
0 Credit Hours

BIOL 400 Biology Seminar  
1 Credit Hour

Prerequisites: BIOL 310 or BIOL 301

The preparation and presentation of a paper, discussion of presentations, and/or the discussion of articles in the scientific literature. This course can be repeated and up to 4 hours can be applied toward the major. Restricted to Biology majors and minors.

Offered: Resident

BIOL 402 Forensic Science Seminar  
1 Credit Hour

Prerequisites: (BIOL 361 or CJUS 340

Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers and/or by readings and discussions of the most recent forensic techniques and applications. Seminars will help prepare students to be leaders in the field of forensic science as law enforcement professionals, crime scene investigators, or forensic laboratory specialists. An oral presentation on a research topic by each student required.

Offered: Resident

BIOL 403 Embryology  
4 Credit Hours

Prerequisites: BIOL 415

Fundamentals of early development and experimental analysis of development systems and a descriptive and comparative study of organogenesis with emphasis on vertebrates.

Offered: Resident

BIOL 408 Animal Behavior  
4 Credit Hours

Prerequisites: BIOL 225

An introduction to the mechanisms and functional significance of animal behavior. Topics include: the role of genes, development, the nervous system, and the endocrine system in the expression of behavior; learning communication, orientation and navigation, and habitat selection; feeding, reproductive, and parenting strategies; mating systems and social behavior. Labs will employ both observational and experimental methods in the lab and in the field.

Offered: Resident

BIOL 410 Environmental Biology  
4 Credit Hours

Prerequisites: BIOL 310 and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)

Field and lab methods used by government and industry to assess the impact of a pollutant upon an ecosystem including toxicity testing, in stream evaluations of macro invertebrates and fish, exposure and risk assessment modeling.

Offered: Resident

BIOL 415 Cell Biology  
4 Credit Hours

Prerequisites: BIOL 301 and (CHEM 301 and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)

A study of the organization and function of living matter at the cellular level. Special emphasis will be given to the integration of molecular and cellular interactions for the maintenance of life.

Offered: Resident

BIOL 416 Comparative Animal Physiology  
4 Credit Hours

Prerequisites: BIOL 225 and CHEM 122 and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)

A comparative study of the differences and similarities in the functional processes of animals belonging to various animal groups in a variety of environmental settings.

Offered: Resident

BIOL 418 Vertebrate Natural History  
4 Credit Hours

Prerequisites: BIOL 208 or BIOL 225

A study of the life history of the vertebrates with special emphasis on their taxonomy, life cycles, and ecological relationships. Vertebrates native to central Virginia will receive special attention.

Offered: Resident
BIOL 419 Ornithology 4 Credit Hours

**Prerequisites:** BIOL 225

An introduction to the study of birds including anatomy, physiology, life cycle, behavior, population biology, ecology, and taxonomy. The emphasis of lab will be on field techniques of identification and study of species native to Virginia.

**Offered:** Resident

---

BIOL 420 Immunology 4 Credit Hours

**Prerequisites:** BIOL 303 and BIOL 301

A comprehensive view of the basic principles of the immune system of living organisms, with particular emphasis on humans. It examines the cells and tissues of the immune system, describes the structure and function of immunoglobulins, and examines their interactions with antigens.

**Offered:** Resident

---

BIOL 421 Forensic Entomology 3 Credit Hours

**Prerequisites:** BIOL 225 or CJUS 330 or CJUS 340

An introductory course designed to explore the use of insects and other arthropods in the field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade, and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed.

**Offered:** Resident

---

BIOL 435 Neurobiology 3 Credit Hours

**Prerequisites:** BIOL 301 or BIOL 313 or BIOL 385

An investigation of neurons and the nervous system. Topics include action potential, synaptic transmission and neuromodulation; the processing of sensory information in visual and auditory systems, and other senses; sensory integration and motor behaviors; neural mechanism of learning and memory, sleep/wakefulness, and reward and decision-making.

**Offered:** Resident

---

BIOL 455 Molecular Techniques 3 Credit Hours

**Prerequisites:** BIOL 415

This course covers the basic molecular biological techniques involved in the study of DNA, RNA, and proteins. Specific techniques include: PCR; DNA cloning; library screening; proteomics and the use of gene sequence databases; and molecular modeling. (Formerly BCHM 455)

**Offered:** Resident

---

BIOL 462 Forensic DNA Analysis Laboratory 2 Credit Hours

**Prerequisites:** (BIOL 301 or BIOL 361 or CHEM 321 or CJUS 330 or CJUS 340) and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)

This integrated laboratory course will introduce the student to techniques currently used in forensic DNA FNA profiling crime laboratories. Laboratory activities include extraction and quantification of DNA from biological sources and the use of PCR-based techniques to generate DNA profiles. Additional activities will include solution preparation, sample processing, handling and preservation, recordkeeping (e.g., chain of custody), data interpretation and report generation. Other topics include the historical development of DNA typing methods, alternative procedures employed in laboratories, and the ongoing development of new DNA typing methods. Legal issues associated with quality control, frequency or probability estimates, and admissibility will also be presented.

**Offered:** Resident

---

BIOL 465 Trace Evidence 2 Credit Hours

**Prerequisites:** BIOL 225 or CHEM 122 or CJUS 230

This course will introduce students to the principles and methods used in the analysis of forensic trace and impression evidence. Students will evaluate trace and impression evidence, such as hairs, fibers, soil, glass, paint, firearms, ammunition components, toolmarks, and blood splatter, using various instruments (e.g., forensic comparison microscopes, fourier transform infrared (FTIR) spectroscopy, and gas chromatography/mass spectroscopy) and techniques used in Federal, state and private forensic laboratories. Emphasis will also be placed on chain of custody, reporting results and expert witness testimony.

**Offered:** Resident

---

BIOL 495 Special Problems in Biology 1-4 Credit Hours

The preparation of a paper based on library, laboratory, and/or field research of a problem selected after consultation with the biology faculty. Limited to students planning to pursue graduate studies in biology. Only four (4) hours may count toward the biology major.

**Registration Restrictions:** Sixteen (16) hours of biology and consent of instructor and Department Chairman.

**Offered:** Resident

---

BIOL 497 Special Topics in Biology 1-4 Credit Hours

**Offered:** Resident

---

BIOL 497 - Special Topics in Biology (1 to 3 hours)
BIOL 499 Internship 1-6 Credit Hours

Prerequisites: (BIOL 200 and BIOL 207 and BIOL 208) or (BIOL 200 and BIOL 211 and BIOL 212)

A directed practical work experience under the supervision of the Biology Faculty Intern Advisor, in the student’s area of career interest. Applications are processed through the Biology Department Faculty Intern Advisor. Applicants must apply the semester prior to starting the internship. This course is pass/fail.

Registration Restrictions: 3.00 GPA and Junior or Senior Standing and 21 hours completed in Biology (including 16 hours upper level Biology) and a declared major in the Biology and Chemistry department; not more than one CSER behind.

Offered: Resident

All applicable prerequisites must be met

Graduation Requirements

- 120 Total hours
- 2.0 Overall grade point average
- 30 Hours must be upper-level courses (300-400 level)
- Grade of 'C' Minimum required for all upper-level courses in the major
- 50% Of major taken through Liberty University
- 30 Hours must be completed through Liberty University
- Grad App Submission of Degree Completion Application must be completed within the last semester of a student's anticipated graduation date
- CSER All requirements must be satisfied before a degree will be awarded

Zoology Major (B.S.)

Purpose

The purpose of the Zoology major is to prepare students for veterinary, medical, and related professional schools, graduate school, and employment involving animals.

Program Learning Outcomes

The student will be able to:

1. Apply standards and principles of safe practice in the laboratory or field environment.
2. Understand ethical issues in the life sciences in light of a biblical/Christian worldview.
3. Demonstrate knowledge of fundamental zoological concepts.
4. Conduct, analyze, and summarize research related to zoological sciences.

Program of Study

Delivery Format: Residential Only

- Zoology (B.S.) - Resident (p. 882)

Career Opportunities

- College Professor/Researcher
- Physician
- Veterinarian
- Veterinary Technician
- Wildlife Biologist
- Zoo Curator

Courses

BIOL 101 Principles of Biology 3 Credit Hours
An examination of the fundamental characteristics common among living things. Emphasis is placed upon studies of the cell, energy, metabolism, reproduction, heredity, ecology, phylogeny and the diversity of life.

BIOL 102 Principles of Human Biology 3 Credit Hours
An examination of structure, function, development and homeostatic interaction in higher organisms with special emphasis on human body systems.

BIOL 103 Principles of Biology Laboratory 1 Credit Hour
Prerequisites: BIOL 101
Laboratory exercises selected to demonstrate basic biological concepts. Emphasis is on plant and animal cell chemistry, composition and function, organismal structure and function, biological diversity and population ecology.

BIOL 104 Principles of Human Biology Laboratory 1 Credit Hour
Prerequisites: BIOL 102
Laboratory exercises selected to demonstrate basic biological concepts. Emphasis is placed on structure and function in higher organisms, development, behavior, parasitism, and the history of life.

BIOL 110 General Biology 4 Credit Hours

BIOL 203 Introductory Microbiology 4 Credit Hours
Prerequisites: HLTH 202 or HLTH 222 or BIOL 212 or (BIOL 215 and BIOL 216)
An examination of the fundamental principles of microscopic organisms. Microorganisms are examined with regard to cell structure, metabolism, heredity, diversity and taxonomy. The basic concept of genetic engineering, pathogenicity, human disease, and immunology are presented.

Registration Restrictions: Restricted to Family and Consumer Sciences and health-related majors.

Offered: Resident

BIOL 203L Introductory Microbiology Lab 0 Credit Hours
Prerequisites: BIOL 203 (may be taken concurrently)

Offered: Resident
BIOL 204 Microbiology for Nursing Professionals  4 Credit Hours

**Prerequisites:** BIOL 215 and BIOL 216

An examination of the fundamental principles of microscopic organisms. Microorganisms are examined with regard to cell structure, growth, heredity, diversity, and epidemiology. The basic concepts of pathogenicity, immunology, human disease, and genetic engineering are presented.

**Registration Restrictions:** Restricted to online students with an RN license pursuing a BSN.

BIOL 213 Human Anatomy and Physiology I  3 Credit Hours

A study of the structure and function of the human body with emphasis on cells, tissues, skin, nerves and special senses, muscle bones, and coordination and control of body movements. Concepts in physiology, including the maintenance of homeostasis, will be discussed. (Formerly BIOL 211 lecture)

**Note:** May not be used for general education credit except in conjunction with BIOL 215.

**Offered:** Resident

BIOL 214 Human Anatomy and Physiology I Lab  1 Credit Hour

**Prerequisites:** (BIOL 213 or BIOL 313

Laboratory exercises selected to demonstrate principles of human anatomy and physiology. Emphasis is placed on the structure and function (including hands-on clinical analyses) of the cardiovascular, endocrine, lymphatic, respiratory, digestive, urinary and reproductive systems. Exercises include hand-on clinical analyses and dissection of preserved specimens. (Formerly BIOL 212 Lab)

**Offered:** Resident

BIOL 215 Human Anatomy and Physiology II  3 Credit Hours

**Prerequisites:** BIOL 213

A continuation of BIOL 213. A study of the structure and function of the human body with emphasis on the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary and reproductive systems. Concepts in physiology, including the maintenance of homeostasis, will be discussed. (Formerly BIOL 212 Lecture)

**Note:** May not be used for general education credit except in conjunction with BIOL 213.

**Offered:** Resident

BIOL 216 Human Anatomy and Physiology II Lab  1 Credit Hour

**Prerequisites:** BIOL 214 and (BIOL 215 (may be taken concurrently) or BIOL 313 (may be taken concurrently)

Laboratory exercises selected to demonstrate principles of human anatomy and physiology. Emphasis is placed on the structure and function of the endocrine, lymphatic, respiratory, digestive, urinary and reproductive systems. Exercises include hand-on clinical analyses and dissection of preserved specimens. (Formerly BIOL 212 Lab)

**Offered:** Resident

BIOL 224 General Biology I  4 Credit Hours

**Prerequisites:** Placement Score-Math with a score of 75 or SAT Section Math with a score of 530 or (pre2016 post1995)SAT Math with a score of 500 or ACT Composite with a score of 20 or MATH 121 or MATH 122 or MATH 125 or MATH 126 or MATH 128 or MATH 130 or MATH 131 or MATH 201 or MATH 2XX or (BIOL 101 and BIOL 103) or BIOL 215

An introduction to the fundamental principles of Biology. Emphasis is placed upon scientific methodology; molecular, cellular and energetic bases of life; major metabolic processes; cellular and organismic reproduction; Mendelian and population genetics; speciation; phylogenetic reconstruction; ecological interactions; and a brief survey of organisms. Restricted to Biology and pre-professional students. (Formerly BIOL 200)

**Offered:** Resident

BIOL 224L General Biology I Lab  0 Credit Hours

**Prerequisites:** (pre2016 post1995)SAT Math with a score of 500 or SAT Section Math with a score of 530 or ACT Composite with a score of 20 or Placement Score-Math with a score of 75 or MATH 121 or MATH 122 or MATH 125 or MATH 126 or MATH 128 or MATH 130 or MATH 131 or MATH 201 or MATH 2XX or (BIOL 101 and BIOL 103) or BIOL 215 and BIOL 224 (may be taken concurrently)

**Offered:** Resident

BIOL 225 General Biology II  4 Credit Hours

**Prerequisites:** BIOL 224

Survey of the major phyla of the Kingdoms Animalia, and Protista including classification, development, morphology, anatomy, and physiology. Emphasis is placed on mammalian systems including support and movement, circulation and respiration, hormonal and nervous control, homeostasis, digestion, immunity and reproduction. (Formerly BIOL 208)

**Offered:** Resident

BIOL 225L General Biology II Lab  0 Credit Hours

**Prerequisites:** BIOL 224 or BIOL 200 and BIOL 225 (may be taken concurrently)

**Offered:** Resident
BIOL 299 Internship
0 Credit Hours
A directed practical work experience under the supervision of the Chair of Biology, in the student's area of career interest. Application processed through the Career Center. Must apply semester prior to internship.

Registration Restrictions: Sophomore status, 2.00 GPA, two courses in major, declared major, not more than one CSER behind.

Offered: Resident

BIOL 301 Genetics
4 Credit Hours
Prerequisites: BIOL 225 and CHEM 122
A study of the principles of heredity with emphasis on inheritance in individuals and populations, chromosomal rearrangements, the chemistry of the gene in DNA structure and replication, transcription, translation, the control of gene expression, mutations and their repair, genetic engineering and epigenetic.

Offered: Resident

BIOL 301L Genetics Lab
0 Credit Hours
Prerequisites: (BIOL 208 and CHEM 122) or (BIOL 225 and CHEM 122) or (BIOL 215 and BIOL 216 and BIOL 224 and CHEM 122)

Offered: Resident

BIOL 303 Microbiology
4 Credit Hours
Prerequisites: BIOL 225 and CHEM 122
An introduction to micro-organisms with emphasis on principles and techniques of culture and identification, life processes, and diversity of micro-organisms.

Offered: Resident

BIOL 305 Parasitology
4 Credit Hours
Prerequisites: BIOL 225
A study of major protozoan, helminth, and insect parasites, dealing with their form, function, life cycle, pathology, epidemiology, classification, geographical distribution, treatment and control.

Offered: Resident

BIOL 307 Plant Physiology
4 Credit Hours
Prerequisites: BIOL 225 and CHEM 301
A study of the biochemical and biophysical processes of plants. Emphasis is given to plant-soil water and mineral relations, nutrient cycling, photosynthesis and carbon metabolism, and plant growth and development.

Offered: Resident

BIOL 310 Ecology
4 Credit Hours
Prerequisites: (BIOL 208 or BIOL 225) and (MATH 201 or MATH 211 or BUSI 230)
An examination of the interrelationships between organisms and biotic and abiotic factors in their environment. The emphasis of the lab is the collection and statistical analysis of quantitative ecological data.

Registration Restrictions: Junior or Senior status

Note: Offered fall semester.

Offered: Resident

BIOL 313 Clinical Human Anatomy
3 Credit Hours
Prerequisites: BIOL 225
This lecture course examines the structures of the human body using both systemic and regional approaches with emphasis on clinical applications and common pathologies. Special attention is placed on gross anatomy that is important in general practice, emergency medicine and surgery while demonstrating anatomy's relationship to physical examination and diagnosis. An overview of the body systems is followed by a special focus on the thoracic, abdominal, pelvic and lower limb regions.

Offered: Resident

BIOL 316 Human Biological Variation
3 Credit Hours
Prerequisites: BIOL 215 or BIOL 313
This course examines the anatomical, genetic, and behavioural characteristics that both unite mankind and distinguish humans from apes and other animals. Biological variation in modern and ancient man will be explored.

Offered: Resident

BIOL 317 Botany
4 Credit Hours
Prerequisites: BIOL 224
A survey of the Fungi, Protista, and Plantae kingdoms with an emphasis on the morphology, physiology, anatomy, taxonomy, ecology, reproduction, and phylogeny of plants. The lab includes collection and analysis of experimental data on plants both in the lab and field. (Formerly BIOL 207)

Offered: Resident

BIOL 320 Introduction to Entomology
4 Credit Hours
Prerequisites: BIOL 208 or BIOL 225 or BIOL 212 or (BIOL 215 and BIOL 216)
An introduction to the study of insects including structure, physiology, life histories, ecology and taxonomy with a special emphasis on those insects of medical and economic importance.

Offered: Resident

BIOL 415 Cell Biology 4 Credit Hours
Prerequisites: BIOL 301 and (CHEM 301 and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)
A study of the organization and function of living matter at the cellular level. Special emphasis will be given to the integration of molecular and cellular interactions for the maintenance of life.
Offered: Resident

BIOL 416 Comparative Animal Physiology 4 Credit Hours
Prerequisites: BIOL 225 and CHEM 122 and (RSCH 201 or Inquiry Research with a score of 80 or Research with a score of 80 or Research (prior to 2017-2018) with a score of 80)
A comparative study of the differences and similarities in the functional processes of animals belonging to various animal groups in a variety of environmental settings.
Offered: Resident

BIOL 418 Vertebrate Natural History 4 Credit Hours
Prerequisites: BIOL 208 or BIOL 225
A study of the life history of the vertebrates with special emphasis on their taxonomy, life cycles, and ecological relationships. Vertebrates native to central Virginia will receive special attention.
Offered: Resident

BIOL 419 Ornithology 4 Credit Hours
Prerequisites: BIOL 225
An introduction to the study of birds including anatomy, physiology, life cycle, behavior, population biology, ecology, and taxonomy. The emphasis of lab will be on field techniques of identification and study of species native to Virginia.
Offered: Resident

BIOL 420 Immunology 4 Credit Hours
Prerequisites: BIOL 303 and BIOL 301
A comprehensive view of the basic principles of the immune system of living organisms, with particular emphasis on humans. It examines the cells and tissues of the immune system, describes the structure and function of immunoglobulins, and examines their interactions with antigens.
Offered: Resident

BIOL 421 Forensic Entomology 3 Credit Hours
Prerequisites: BIOL 225 or CJUS 330 or CJUS 340
An introductory course designed to explore the use of insects and other arthropods in the field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, thefts, the illegal drug trade, and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed.
Offered: Resident

BIOL 425 Molecular Techniques 3 Credit Hours
Prerequisites: BIOL 415
This course covers the basic molecular biological techniques involved in the study of DNA, RNA, and proteins. Specific techniques include: PCR; DNA cloning; library screening; proteomics and the use of gene sequence databases; and molecular modeling. (Formerly BCHM 455)
Offered: Resident

BIOL 435 Neurobiology 3 Credit Hours
Prerequisites: BIOL 301 or BIOL 313 or BIOL 385
An investigation of neurons and the nervous system. Topics include action potential, synaptic transmission and neuromodulation; the processing of sensory information in visual and auditory systems, and other senses; sensory integration and motor behaviors; neural mechanism of learning and memory, sleep/wakefulness, and reward and decision-making.
Offered: Resident

BIOL 455 Molecular Techniques 3 Credit Hours
Prerequisites: BIOL 415
This course covers the basic molecular biological techniques involved in the study of DNA, RNA, and proteins. Specific techniques include: PCR; DNA cloning; library screening; proteomics and the use of gene sequence databases; and molecular modeling. (Formerly BCHM 455)
Offered: Resident
BIOL 465 Trace Evidence  
2 Credit Hours

Prerequisites: BIOL 225 or CHEM 122 or CJUS 230

This course will introduce students to the principles and methods used in the analysis of forensic trace and impression evidence. Students will evaluate trace and impression evidence, such as hairs, fibers, soil, glass, paint, firearms, ammunition components, tools, and blood splatter, using various instruments (e.g., forensic comparison microscopes, Fourier transform infrared (FTIR) spectroscopy, and gas chromatography/mass spectroscopy) and techniques used in Federal, state, and private forensic laboratories. Emphasis will also be placed on chain of custody, reporting results and expert witness testimony.

Offered: Resident

BIOL 495 Special Problems in Biology  
1-4 Credit Hours

The preparation of a paper based on library, laboratory, and/or field research of a problem selected after consultation with the biology faculty. Limited to students planning to pursue graduate studies in biology. Only four (4) hours may count toward the biology major.

Registration Restrictions: Sixteen (16) hours of biology and consent of instructor and Department Chairman.

Offered: Resident

BIOL 497 Special Topics in Biology  
1-4 Credit Hours

BIOL 497 - Special Topics in Biology (1 to 3 hours)

Offered: Resident

BIOL 499 Internship  
1-6 Credit Hours

Prerequisites: (BIOL 200 and BIOL 207 and BIOL 208) or (BIOL 200 and BIOL 211 and BIOL 212)

A directed practical work experience under the supervision of the Biology Faculty Intern Advisor, in the student's area of career interest. Applications are processed through the Biology Department Faculty Intern Advisor. Applicants must apply the semester prior to starting the internship. This course is pass/fail.

Registration Restrictions: 3.00 GPA and Junior or Senior Standing and 21 hours completed in Biology (including 16 hours upper level Biology) and a declared major in the Biology and Chemistry department, not more than one CSER behind.

Offered: Resident

Zoology (B.S.) - Resident

Important: This degree plan is effective for those starting this degree program in fall 2019 through summer 2020. This degree plan will remain in effect for students who do not break enrollment or who do not change degree programs, concentrations, or cognates.

Public Health Major (B.S.)

The Public Health major prepares students for careers in health related professions, wellness, injury and disease prevention through either the Health Promotion concentration or the Pre-Clinical concentration. The Health Promotion concentration trains students to serve as health education specialists in the healthcare industry, business, government and nonprofit organizations. It also trains those seeking graduate studies in clinical fields, public health and more. The Pre-Clinical concentration prepares students for entrance into medical, dental, physician assistant, physical therapy or occupational therapy schools or other allied health graduate programs. At the completion of the program, students qualify and are encouraged to take the national Certified Health Education Specialist (CHES) examination for certification.

- Health Promotion Concentration
- Pre-Clinical Concentration

Program Learning Outcomes

The student will be able to:

1. Investigate population health status, needs, and resources using appropriate assessment and analytical methods.
2. Develop, implement and evaluate public health programs to address identified population determinants of health.
3. Demonstrate effective written, oral, and electronic methods of communicating health information with selected audiences.
4. Identify principles of public health interventions that address disparities and inequalities in health access and health status in the context of culture, race, gender, and economics.
5. Describe principles of community collaboration to enhance community capacity for health.
6. Identify the scientific basis for public health problems.
7. Identify concepts of public health philosophy and organization, including infrastructure, funding and delivery in the U.S.
8. Identify principles of public health leadership, including systems thinking, group process, social justice, and ethics.
9. Describe health from the perspective of God's purposes for humanity in creation, fall, and redemption.

Fee and Expenses

In addition to university tuition and fees, students may incur additional expenses. These expenses include, but are not limited to: first aid and CPR certifications, professional memberships, transportation costs associated with off-campus internship and related experiences, TB (PPD) skin test, cost of medical examination and background check, if required by internship site.

Program Standards

- GPA in Major: Students must achieve a “C” or better in upper level courses within the major.
- Overall GPA: Students must have a minimum cumulative GPA of 2.35 in order to register for HLTH 499 Professional Internship in Health Promotion (1-12 c.h.).
- Upon declaring the major, students must review and abide by the policies and standards of the major.

Internship

Health Promotion students (and Pre-Clinical students who choose and meet the requirements) complete an internship at the end of the curriculum sequence. Students are required to select their internship site and have it approved by the internship coordinator. They may choose from a variety of sites offering health and wellness programming and must work with a qualified site supervisor. The internship experience provides exceptional opportunities for students to apply their knowledge, skills, and abilities acquired through the Public Health program in a professional setting as well as the opportunity to experience various career paths available to them upon graduation.

Prerequisite:

- Senior Status;
- Completion of HLTH 452 Methods and Materials in Community Health Education (3 c.h.) and HLTH 453 Program Planning and Evaluation in Health Education (3 c.h.);
- minimum overall GPA of 2.35 or better;
• current First Aid and Adult, Child, and Infant CPR certified; or
• consent of the Public Health Program Director.

Liberty University School of Music is the seventh largest collegiate level institution in America devoted to training and equipping professional musicians as performers, music educators, worship leaders, ethnomusicologists, artists, film score composers, music publishers, recording engineers and producers, and songwriters. The School of Music is a member of and Accredited by the National Association of Schools of Music (NASM). NASM is recognized by the Council for Higher Education Accreditation as a programmatic accreditation organization for institutions offering degree and non-degree educational programs in music and music-related disciplines.

**Mission**

The mission of the Liberty University School of Music is to train and equip musicians to be Champions for Christ. The School of Music is a community of God-honoring musicians committed to a culture of manifest core values that include:

- **Worship Lifestyle**
- **Servant Leadership**
- **Stylistic Diversity**
- **Academic Inquiry**
- **Skilled Musicianship**
- **Artistic and Creative Expression**
- **Sharing Christ through Music**

These core values demonstrate what the music faculty believes a “Champion for Christ Musician” is devoted to in their everyday private and professional life. It is the general consensus of the School of Music faculty that the mission statement and clearly articulated core values conform to and promote the broader university mission to “develop Christ-centered men and women with the values, knowledge, and skills essential to impact the world”.

While the School of Music has only one mission, two distinctly unique and focused tasks emerge. These tasks are accomplished through two organizations within the School of Music structure:

1. **The Center for Music and the Performing Arts** – trains and equips passionate musicians as skilled performers and music education specialists; and,
2. **The Center for Music and Worship** – trains and equips highly skilled musicians to serve as worship practitioners in the evangelical community. In fulfillment of the School of Music Mission, communication of the Core Values and application of the Focused Tasks and the various entities representing the music unit, it is the aim of the School of Music leadership to graduate students that are thoroughly equipped to assume their role in the market-place. And, that the School of Music provides for these student-musicians comprehensive curricula that is broad enough to encourage collaboration, imagination, diversification, scholarship and practical application. It is important to the leadership of the School of Music that students are equipped to identify their calling (desired career), find gainful employment (a job) and contribute to their chosen vocation(s) for many years to come.

Faculty
The School of Music (SOM) faculty includes full-time and adjunct and/or part time resident and on-line highly skilled professionals. The School of Music faculty adhere to and adopt five personal and professional goals, including a commitment to:

1. Embrace, develop, grow and exemplify a spirit of Christian grace, character, integrity and mercy in all areas of professional and private life. [Spiritual Disciplines]
2. Intellectual discovery, educational enrichment and rigorous pursuit of knowledge for the advancement of their own individual disciplines. [Educational Enrichment]
3. Develop and grow as professional practitioners. [Professional Development]
4. Make honest contribution to local and global communities for the purpose of spreading the gospel and proclaiming the name of Jesus Christ. [Community and Mission]
5. Christ. [Community and Mission]
6. Grow in their understanding of institutional mission, love for one another, vision for the future, and support of Liberty University School of Music. [University Mission]

Additionally, and in an effort to enrich our student’s lives, SOM faculty promise, to the best of their ability, to provide:

1. A quality, world-class education experience. [Quality Education]
2. Opportunity to grow in their aptitude and ability and performance skill in their instrument of choice. [Personal Growth]
3. Opportunity for spiritual, educational, and social transformation and growth sufficient to make meaningful contribution to their culture, discipline and the Kingdom of God. [Contribution to Culture]
4. Opportunity to discover potential through mentoring and discipleship experiences. [Opportunity to Discovery and Creativity]
5. Assistance in finding career placement in their chosen area of music performance, skill set and/or ministry. [Career Placement]

It is the conviction of the School of Music faculty that the manifestation of these qualities in the lives of all resident and on-line music professors is critical to the success of the School of Music. The personal commitment to these ten statements is used as one of several criteria for the annual evaluation of School of Music faculty.

**Center for Music & Worship**

**Purpose**

The purpose of the *Center for Music and Worship (CFMW)* is to equip and train highly skilled musicians to serve as worship practitioners and commercial musicians in the evangelical community. This is accomplished through curricula development, local church ministry, partnerships with the publishing and recording industry, artist development and empirical research.

Today’s local churches need both music ministers and worship leaders to take charge of a multi-faceted, changing ministry. These ministries no longer require personnel exclusively equipped as musicians. Rather, they require professionals who have broad experience in worship teaching, worship training, team management and discipleship, worship evangelism, principles of marketing technology, drama and music.

Pastors seek to meet the challenge of ministry to increasingly more diverse congregations with theological integrity practical to broad ranging needs. They look for worship leaders who capture their vision and seize the opportunity to minister worship with excellence and creativity. Liberty University's Center for Worship seeks to equip students for these multi-faced career opportunities.

**IAACT and CAF Membership**

The Center for Music and Worship holds membership with the International Association of Artists in Christian Testimony (IAACT), a missions-sending agency based in Brentwood, Tennessee. This agency endorses young artists, music ministries, worship leaders, and support personnel for local, regional, and international artistic service. Key to their mission is partnerships with worship institutions and evangelical organizations committed to training worship personnel for full time church related ministry.

In the spring of 2006, Liberty University's Center for Music and Worship was granted approval to host a student chapter of Christian Artist Fellowship (CAF). This is a national organization that encourages training, mentoring, advancement, internship opportunity, career placement, over-seas mission opportunity, fund raising tax shelter, and research related to individual musicians, groups and artists.

**Department of Applied Music Studies**

The *Department of Applied Music Studies* serves the Center for Music and Worship by providing training and supervision of the performance and applied music studies in the Bachelor of Music in Commercial Music, Bachelor of Music in Music and World Cultures, the Bachelor of Music in Worship Leadership and the Bachelor of Science in Music and Worship. Faculties serving in this department touch and influence the lives of every student participating in some type of undergraduate major in the Center for Music and Worship.

**Department of Commercial Music**

The purpose of the *Department of Commercial Music* is to serve the Center by facilitating the training and equipping of commercial music practitioners for the Evangelical Community. Commercial music programs have grown in influence and popularity over the past four decades. More and more, local church ministries are developing “in-house” recording, publishing, songwriting and film score divisions. They are expressing need for personnel skilled and equipped to manage these highly visible and influential initiatives.

Liberty University School of Music has answered this call by designing five programs of study that will have immediate appeal to the student seeking employment in the evangelical community as Christian artists, songwriters, recording engineers, music producers, publishers, performers of jazz or film industry practitioners. Liberty University adds Biblically-centered worldview instruction to this growing discipline preparation. We believe scores of qualified musicians will graduate from these programs of study fully equipped as performers, songwriters, film composers and/or creators of commercial music for the Evangelical Community.

**Department of Music and Worship Studies**

The purpose of the *Department of Music and Worship Studies* is to serve the Center as an academic training agency solely committed to the mission of equipping worship leaders and church practitioners for ministry in the various evangelical traditions. *The Department of Music and Worship Studies* is a division of the Liberty University Center for Music and Worship and is committed to meeting academic requirements critical to successful examination, communication and implementation of practitioner-oriented curriculum the growing worship disciplines.

*The Department of Music and Worship Studies* strategically, and more specifically, provides opportunity for students to obtain job familiarity and proficiency through meaningful and professional, practitioner experiences. Each major, no matter the emphasis, is required praxis, practicum, and internship training. The end goal is to “equip the student” so that upon graduation employee/job tasks may be immediately performed with skill and professional ability. Much of this training is accomplished through comprehensive instruction in historical and contemporary music practices, principles of leadership and creative worship design, study and recognition of the critical roles of the worship leader in 21st century culture, and contextualization of worship practice—all undergirded by the foundational truths of Scripture.

The *Department of Music and Worship Studies* faculty is committed to offer each student occasion to study with godly, highly-skilled instructors, receiving a broad-based musical and theological education that enables students to function successfully as worship practitioners in the diverse and ever-changing field of evangelical worship ministry.
Department of Multi-Ethnic Music Studies
The purpose of the Department of Multi-Ethnic Music Studies is to uniquely equip students to work in a diverse global, ethnic and multi-cultural society by using the medium of music as a tool for communicating the gospel of Jesus Christ.

The Department of Multi-Ethnic Music Studies supervises undergraduate degrees in world music. This study incorporates Music and World Cultures into the total music discipline and provides Liberty University music students opportunity to engage in the music of various cultures through: field experiences; ethnic ensembles; studies in ethnomusicology; and, the discovery of regional music practices around the globe. The various programs in the department fit well with the institution's emphasis on intercultural studies and its stated aim to "contribute to a knowledge and understanding of other cultures."

Center for Music Education & Performance

Purpose

The purpose of the Center for Music Education and Performance is to “train and equip passionate musicians as skilled performers and music education specialists”. This purpose is fulfilled as the Center for Music Education and Performance provides opportunities for musical performance, academic study and training/equipping of students. The Center oversees the following types of degree programs: Music in Liberal Arts, Music Performance, and Music Education.

This educational process is further enhanced through a commitment to comprehensive training in music for those preparing for music careers (leading to a B.M. degree) in guitar, piano, string, vocal, woodwind, brass, or percussion performance; choral or instrumental music with a music education concentration; music strategically geared to the market place; and, a liberal arts education with a music major. In addition, the Center provides music minor curricula for those who wish to receive musical training on an elective basis.

Central to the Center’s purpose is the development of aesthetically sensitive musicians, music educators, professional songwriters, artists, music missionaries, and skilled music performers who, with their skills, knowledge, and professional attitudes, may glorify God in the world through the practice of their craft and the testimony of their lives. To achieve this, the Center for Music Education and Performance has been organized into four strategic departments:

1. The Department of Applied Music Studies serves the Center for Music Education and Performance by providing training and supervision of the performance and applied music studies in the Bachelor of Music, Bachelor of Arts and Bachelor of Science degrees. This includes delivering highly specialized training in voice, guitar, piano, woodwind, brass, strings, percussion, songwriting, and film scoring. The Department of Applied Music Studies faculty is committed to helping performing arts students learn how to:

   1. think critically about performance issues;
   2. develop a high level of performance skill; and
   3. demonstrate stylistic diversity that clearly represents appropriate musicianship.

2. Faculties serving in this department touch and influence the lives of every person doing some type of undergraduate major in music.

3. The Department of Music Theory and History serves the Center for Music Education and Performance by providing training and sequenced skill-based education in all levels of music theory, harmonic practices, aural skills, form and analysis, musicianship, conducting, composition, music history and discipline specific music literature and pedagogy courses. Performance groups affiliated with the Department of Music Theory and History include: the University Chorale, the Concert Choir, Chamber Singers, Percussion Ensemble, Guitar Ensembles, and Liberty University Symphony Orchestra.

   The goal of the Department of Music Theory and History faculty is for each student to demonstrate command of specific cognitive, psychomotor, and aural skills that support work in music reading, conducting, research, music analysis, and music performance. The development of technical fluency and musical expressivity are supported by the Department of Music Theory and History; which provides foundational training to
musicians in practical musicianship, music theory, conducting, research, and music history.

The Department of Music Education serves the Center for Music Education and Performance by providing training for students preparing for career opportunities in elementary and secondary school settings. The goal of the Department of Music Education faculty is to equip each student to learn and develop teaching competencies for the public, private, and Christian school markets. This is established by developing — in conjunction with the Departments of Music and Applied Music — comprehensive techniques in pedagogy, applied music, music directing, improvisation, and administration suitable to serve a community of education in music leadership. The department also provides opportunity for students to learn how to apply learned principles of “Praxis methodology” to all areas of music education.

Finally, The Department of Music Education supervises the practice teaching program in area elementary and secondary schools, and provides highly specialized training in voice, guitar, piano, wind, string, and percussion pedagogy methodologies.

The Department of University Bands represents the Center for Music Education and Performance through the Liberty University Marching Band; the Spirit Band; the Liberty University Wind Ensemble; the University Band; and the Jazz Band. All of these performing groups represent the university in various public relation capacities, including regular performances by the University Marching Band at Liberty University football games and The Spirit Band at Liberty University basketball games.

Faculty assigned to The Department of University Bands seek to provide holistic opportunities for students to mature in their personal, spiritual, social and academic lives. This includes the integration of faith and learning, which is fundamental to a Christian world-view and an essential part of the entire band program at Liberty University.

CMPA Programs of Study

There are a variety of undergraduate degrees in music from which to choose, including: B.A. or B.S. in Music; five B.M. Performance degrees; two degrees in Music Education Studies; and, the music minor. These programs of study are designed to equip graduating students to enter the market place as skilled music professionals in each of their strategic area of interest.

All music programs require the student to select a primary and secondary performance area (keyboard, non-keyboard instruments, voice, or songwriting). Students doing special studies in music education must select either the choral or instrumental music major with a concentration in music education and complete rigorous studies in elementary and secondary education.

The School of Music Student Handbook is available online to assist students in understanding every aspect of the various music programs at Liberty University.

Students are encouraged to audition for faculty members:

1. during the College for a Weekend (CFAW) activities;
2. by individual appointment throughout the school year; or
3. by sending a DVD of student performance to the School of Music offices.

A music audition is not required for admission to the university or the School of Music, but is important for evaluation of a student’s potential for success in the pursuit of a music degree, placement for applied lessons, scholarship consideration, and for participation in one of the major ensembles or chamber groups.

All students pursuing any music degree must complete a piano proficiency exam before graduation, present a senior recital, and register attendance at a specific number of approved concerts and/or student recitals. (The number of concerts and recitals varies according to the degree emphasis. See the School of Music Student Handbook for more information.)

Programs

Liberal Arts Degrees in Music

• Music Major (B.A./B.S.) Instrumental (p. 965)
• Music Major (B.A./B.S.) Vocal (p. 990)

Performance Degrees

Purpose

Liberty University offers five highly professional Bachelor of Music degrees that uniquely equip students as skilled performers and music practitioners. These include: B.M. in Guitar Performance; B.M. in Piano Performance; B.M. in String Performance; B.M. in Vocal Performance; and, B.M. in Woodwind, Brass or Percussion Performance. All degrees in this area of study include 24 – 26 hours of applied music studies, two semesters of conducting, music technology, and contemporary styles survey. At least 65% of the degree is specifically devoted to music studies on one level or another.

The student is required to complete a keyboard proficiency, attend 56 approved concerts and recitals, maintain a minimum GPA of 2.00 in music courses and complete the Sophomore Performance Review.

Program Learning Outcomes

The student will be able to:

1. Demonstrate technical fluency, expressiveness, style, and professionalism in musical performance.
2. Apply broad-based knowledge of music through research in the areas of music history, music theory, and music literature.
3. Integrate Christian faith into the discipline of music.
4. Demonstrate advanced performance skills in appropriate performance media.

• Guitar Performance Major (B.M.) (p. 944)

Music Major (B.A./B.S.) Vocal
Purpose
The purpose of the B.A./B.S. in Music with an emphasis in vocal music is to provide for the student opportunity to complete studies in music while earning a liberal arts degree.

Those completing the 128-hour B.A. in Music are required to complete a minimum of 12 credits in an approved foreign language. An additional 3 hours of “Integrative Studies” affords these students opportunity to broaden their course offerings while completing a liberal arts degree with a major in music.

The B.S. in Music with an emphasis in vocal studies does not require any foreign language. This 120-hour degree gives students opportunity to include 10-14 hours in an elective discipline. Students may choose instrumental or choral techniques courses as part of these electives.

The student is required to complete a keyboard proficiency, attend 56 approved concerts and recitals, maintain a minimum GPA of 2.00 in music courses and complete the Sophomore Performance Review.

Program Learning Outcomes
The student will be able to:
1. Demonstrate technical fluency, expressiveness, style, and professionalism in musical performance.
2. Apply broad-based knowledge of music through research in the areas of music history, music theory, and music literature.
3. Integrate Christian faith into the discipline of music.

Programs of Study
Delivery Format: Residential Only
- Music Vocal (B.A.) - Resident (p. 1010)
- Music Vocal (B.S.) - Resident (p. 1012)

Career Opportunities
- Opera singer
- Oratorio
• Professional recitalist
• Professional voice teacher
• Professor of music (requires graduate degree)

Courses

MUSC 000 Undergraduate Music Assessment 0 Credit Hours

MUSC 010 Graduate Music Assessment 0 Credit Hours

MUSC 100 Fundamental Harmony and Musicianship 3 Credit Hours
A preparatory course in the rudiments of music, stressing the reading and writing of music notation. This course is an elective and may not be used to meet requirements in general studies or for any major. Preparation for MUSC 105.

Offered: Resident

MUSC 103 Music Appreciation 3 Credit Hours
An introduction to major musical styles (including representative composers and compositions) from Antiquity through the 21st century.

Offered: Resident

MUSC 105 Harmonic Practices and Theory I 3 Credit Hours
A practical introduction to harmonic, melodic, and rhythmic principles of music. Musical elements including key signatures, scales, intervals, chords, chord construction and chord progression are introduced as the foundation for harmonic analysis of traditional, contemporary Christian, popular, and jazz music. In addition to the study of common practice theory, special attention is given to the Nashville number system and jazz harmony practices as accepted methodology for music analysis. In-class Praxis provides students opportunity to reinforce learned concepts through collaborative group performance-based learning projects.

Prerequisites: MUSC 105 or WMUS 103 or WRSP 103

(Crosslisted with WMUS 103)

Offered: Resident

MUSC 107 Musicianship I 1 Credit Hour
Listening skills are developed through rhythmic, harmonic, and melodic dictation. Skills are refined through daily sight singing and rhythm exercises from a variety of styles. Special attention is given to tonal center referencing. The ability to identify harmonic rhythm while listening to a variety of musical styles. (Formerly WMUS 105)

Offered: Resident

MUSC 108 Musicianship II 1 Credit Hour

Studies in Music Education

Purpose

Liberty University has long been an advocate for the inclusion of the arts in elementary and secondary education. Our concentrations in music education demonstrate this commitment by providing praxis education experience at all levels of training in music theory, music technology, improvisational technique, arranging, vocal and instrumental pedagogy, and practice teaching. Additional attention is given to directed studies in Music History, Music in World Cultures (Ethnomusicology) and developmental psychology.

The Bachelor of Music with concentrations in Music Education is intended for the student who plans to teach music in Christian, public, or private schools and who seeks licensure as a qualified music teacher by a state department of education. It is also appropriate for the student whose eventual goal is college teaching in fields related to music education. The program is designed to develop competent music professionals with a Christian worldview and skill to work in the educational domain.

Program Learning Outcomes

The student will be able to:

1. Demonstrate technical fluency, expressiveness, style, and professionalism in musical performance.
2. Apply broad-based knowledge of music through research in the areas of music history, music theory, and music literature.
3. Integrate Christian faith into the discipline of music.

Choral Concentration

The student will be able to apply choral and vocal techniques in a manner appropriate for music education.

Instrumental Concentration

The student will be able to apply instrumental techniques in a manner appropriate for music education.

Virginia Music Teacher Licensure

Teacher preparation and endorsement in choral or instrumental music is available in partnership with the School of Music, Department of Music Education, Department of Applied Music Studies, and the School of Education. The teacher licensure in music education programs are approved by the Council for the Accreditation of Education Preparation (CAEP), formerly known as the National Council for Accreditation of Teacher Education (NCATE). Licensure information is also available at http://www.liberty.edu/uguide or www.liberty.edu/SOM.

The following options are available for Teacher Licensure Endorsement (PreK-12) in the Bachelor of Music degree:

• Instrumental Music concentration in Music Education
• Choral Music concentration in Music Education

A student not seeking teacher licensure may elect other courses to fulfill degree requirements. Graduates who are licensed in Virginia may obtain licensure in other states through reciprocity.

Programs

• Choral Music Major (B.M.) Music Education Cognate - Teacher Licensure (p. 1057)
• Instrumental Music Major (B.M.) Concentration in Music Education (p. 1079)
• Music Minors (p. 1101)

- Grad App Submission of Degree Completion Application must be completed within the last semester of a student's anticipated graduation date
- CSER All requirements must be satisfied before a degree will be awarded

**Music Minors**
The 17-19 credit hour minor option is offered to students wishing to augment their educational experiences with a general study in music. As with the music major, those pursuing the music minor select a primary area for study, vocal or instrumental. Students pursuing the music minor may participate in School of Music ensembles, applied music and select music methods classes.

The School of Music administration and faculty leadership strongly encourage students not majoring in music to pursue the music minor. As with all music curricula experience, this encounter in music helps formalize training in the humanities and broaden the student's experience in music performance.

The music minor curriculum does not require a senior recital, music internship or student teaching. However, all students pursuing music minors are required to register attendance at a total of 24 approved concerts and/or recitals before graduation.

Commercial Music Major (B.M.)

Purpose
The B.M. in Commercial Music degree is designed to provide five essentials needed for successful development as a musician training for a career in the commercial music industry:

2. Ensemble Experience;
3. Applied instruction on primary and secondary instruments;
4. Hands-on experience in the music industry under the supervision and mentoring of well-established, professional practitioners; and,
5. Studies in the specialized concentrations in Artist Development, Songwriting, Jazz Studies, Film Scoring (Film and Media) Recording Engineering and Producing or Publishing and Producing.

It is our belief that graduates from the School of Music’s Department of Commercial Music will possess such a high level of musical and industry level skill that they will convey the unique mission of Liberty University to the world – through the Commercial Music field – as stage artists, songwriters, recording session performers and studio musicians, studio engineers and producers, front-of-house engineers, film score composers, and publishers of music for the evangelical community.

Additionally, the emphasis of a Commercial Music degree taught with a specifically Christian Worldview, by professors committed to sound conservative Evangelical theology, sets Liberty University’s Commercial Music curriculum apart from other “music industry” type programs and provides a significant influence in the commercial music industry as a whole.

With the establishment of the Zaki Gordon Center for Cinematic Arts, a fresh new approach to film making and industry influence has emerged. As a complement to the substantial efforts of this new film division, the School of Music has developed a degree in Commercial Music, with at least five optional concentrations, for the purpose of equipping skilled musicians to work closely with these new Christian filmmakers, producing Christian-based film that will impact the culture and the world for Christ.

Finally, all commercial music majors experience intense, industry focused, and evangelical community enriched practicum and internships. These experiences are designed, guided and supervised by skilled leadership in the School of Music’s Department of Practicum.

Four strategic target audiences are served by this degree:

1. Students interested in a diversified commercial music approach to Jazz Studies or Music Performance in a conservative evangelical university.
2. Students interested in writing music for film or music for short films for worship.
3. Students interested in developing skill as a Christian artist or songwriter.
4. Students interested in a developing skill as a recording engineer, producer or publisher strategically serving the evangelical community.

Program Learning Outcomes
The student will be able to:

1. Demonstrate technical fluency, expressiveness, style, and professionalism in musical performance.
2. Apply broad-based knowledge of music through research in the areas of music history, music theory, and music literature.
3. Integrate Christian faith into the discipline of commercial music.

Artist Development Concentration
The student will be able to:

1. Formulate a strategy for developing a successful career in the music industry.
2. Develop contextually based worship strategies.

Film Scoring Concentration (Film and Media)
The student will be able to:

1. Compose music soundtracks with electronic instruments and traditional acoustic instruments for commercial media.
2. Create commercial music projects that involve syncing music to film.

Jazz Studies Concentration
The student will be able to:

1. Arrange commercial music in a jazz style.
2. Perform written and improvised commercial music in a jazz style.

Publishing and Producing Concentration
The student will be able to create quality commercial music content using best practices in music publishing and audio production for worship.

Recording Engineering and Producing Concentration
The student will be able to create quality commercial live and recorded music content using best practices in current audio technology and production.

Songwriting Concentration
The student will be able to:

1. Demonstrate the process of writing, preparing, and presenting a song for professional publication.
2. Develop contextually based worship strategies.

Students pursuing the B.M. in Commercial Music degrees are required to successfully complete: a piano proficiency; attend 56 approved concerts and recitals; maintain a minimum GPA of 2.00 in all MUSC courses; successfully pass a Freshman Promotional Jury and Sophomore performance review; and conducting.

Courses

Music Courses

MUSC 000 Undergraduate Music Assessment 0 Credit Hours

MUSC 010 Graduate Music Assessment 0 Credit Hours

MUSC 100 Fundamental Harmony and Musicianship 3 Credit Hours

A preparatory course in the rudiments of music, stressing the reading and writing of music notation. This course is an elective and may not be used to meet requirements in general studies or for any major. Preparation for MUSC 105.

Offered: Resident

MUSC 103 Music Appreciation 3 Credit Hours

An introduction to major musical styles (including representative composers and compositions) from Antiquity through the 21st century.

Offered: Resident

All applicable prerequisites must be met
MUSC 105 Harmonic Practices and Theory I 3 Credit Hours
A practical introduction to harmonic, melodic, and rhythmic principles of music. Musical elements including key signatures, scales, intervals, chords, chord construction and chord progression are introduced as the foundation for harmonic analysis of traditional, contemporary Christian, popular, and jazz music. In addition to the study of common practice theory, special attention is given to the Nashville number system and jazz harmony practices as accepted methodology for music analysis. In-class Praxis provides students opportunity to reinforce learned concepts through collaborative group performance-based learning projects. (Formerly WMUS 104)

Offered: Resident

MUSC 106 Harmonic Practices and Theory II 3 Credit Hours
Prerequisites: MUSC 105 or WMUS 103 or WRSP 103
Continuation of MUSC 105. Harmonic analysis, part-writing techniques, and chord construction are taught in conjunction with the Nashville Number System, jazz analysis, and traditional figured bass. Principles of tonal music are explored including major-minor seventh chords, major-major seventh chords, minor seventh chords, secondary dominant and leading tone chords, and altered or borrowed chords. Harmonic analysis, part-writing, and construction of rhythm charts are emphasized. In-class Praxis provides students opportunity to reinforce learned concepts through collaborative group performance-based learning projects. (Formerly WMUS 104)

Note: Group or private piano instruction for students needing to successfully pass the Piano Proficiency Examination (PPE).

Offered: Resident

MUSC 107 Musicianship I 1 Credit Hour
Listening skills are developed through rhythmic, harmonic, and melodic dictation. Skills are refined through daily sight singing and rhythm exercises from a variety of styles. Special attention is given to tonal center referencing. The ability to identify harmonic rhythm while listening to a variety of musical styles. (Formerly WMUS 105)

Offered: Resident

MUSC 108 Musicianship II 1 Credit Hour
Prerequisites: (MUSC 105 or WMUS 103 or WRSP 103) and (MUSC 107 or WMUS 105 or WRSP 105)
A continuation of MUSC 107. Further study of harmonic, rhythmic, and melodic dictation and continued development of tonal center referencing technique. Students continue to sharpen listening skills by identifying the harmonic rhythm of a variety of music genre. (Formerly WMUS 106)

Offered: Resident

MUSC 109 Harmonic Practices and Musicianship for Musical Theatre 3 Credit Hours
A course in music theory designed for students in Musical Theatre. Emphasis is placed on essential music theory concepts and provides basic aural skill training incorporating literature of the musical theatre genre. The course introduces the study of notation, rhythm, tonality, and harmony in the context of reading and aural perception through performance and dictation of melodies, intervals, triads, major and minor scales, chord progressions, band basic chord structures. Students demonstrate and apply learned concepts through dictation and praxis presentations. Registration Restrictions: Permission of instructor.

Offered: Resident

MUSC 111 Group Piano I 1 Credit Hour
Enrollment by audition with Keyboard Instructor. A beginning course in piano for students with little or no experience in piano and for students needing remedial study to support MUSC 105, 120 or 121. Strategies for keyboard playing are realized through group instruction, communication of principles for good musicianship, practice room techniques, physical aspects of playing piano, and care of the instrument. MUSC 111 does not satisfy program requirements. Note: (Lessons meet two days each week)

Offered: Resident

MUSC 112 Group Piano II 1 Credit Hour

### Worship Leadership Major (B.M.)

**Purpose**

Over the centuries, the study of worship and its impact on culture has been an important part of musical, historical and sociological analysis. The B.M. in Worship Leadership affords Liberty University students opportunity to examine the impact of worship on the evangelical culture. Students study worship and its application to music in a hands-on environment.
environment and through praxis education experience. Application is further made to 21st century worship pedagogy through studies in contemporary improvisation, contextualization, leadership principles and cultural analysis.

Program Learning Outcomes
The student will be able to:

1. Demonstrate technical fluency, expressiveness, style, and professionalism in musical performance.
2. Apply broad based knowledge of music through research in the areas of music history, music theory, and music literature.
3. Develop contextually based worship strategies.
4. Analyze leadership characteristics within musical contexts.

Michael W. Smith (MWS) Center for Commercial Music

The mission of the new Michael W. Smith (MWS) Center for Commercial Music is to train competent, proficient marketplace musicians to serve as commercial music industry practitioners.

There are three primary goals:

1. Liberty University School of Music will be recognized as a major center for musical excellence for the music industry and the #1 choice for training and equipping of professionals for the music industry!
2. And for LUSOM to penetrate the market and expand the brand at the least possible cost with resources available.
3. Liberty University is one of the leading universities in America for digital streaming of education.

Yet the university streams ZERO music. With the establishment of this center, what we have done in education we can now do in music. The idea is that within the next 5 years, every song used on this campus - virtual or residential, for any purpose, will be owned and published by the School of Music!

Dual Degree Program

Bachelor of Science in Nursing (B.S.N.) for RNs: Post-Licensure and Master of Science in Nursing (M.S.N.)

Purpose

The RN-BSN-MSN program will sharpen students' knowledge, skills, and abilities as they manage in the capacity of a healthcare professional.

Program Specific Admission Requirements

Admission to the Bachelor of Science in Nursing (BSN) and a Master of Science in Nursing (MSN) program is a competitive process.

Admission standards for RN-BSN-MSN include:

1. Students must have earned a diploma or an Associate Degree in Nursing through an NLN/ACEN or CCNE accredited nursing program.
2. Current and Active Registered Nurse license.
3. Documentation of the ability to meet the Essential Attributes of Nursing.
4. Students admitted to the RN-BSN-MSN program with less than a 3.0 GPA will be required to follow the academic standing policy in the undergraduate catalog (https://www.liberty.edu/index.cfm?PID=39273).
5. Students must earn a grade of B- or above in each of the MSN courses (NURS 500 Research (3 c.h.) & NURS 503 Managing Population Health (3 c.h.)). Earning a grade of C in any of the two MSN courses means the student must reapply to take the corresponding RN to BSN course (NURS 225 Research in Nursing (3 c.h.) & NURS 445 Population Health (3 c.h.)) before the student may repeat the graduate-level course. If a grade of D or below is earned in any of the two MSN transition courses, the student is no longer in the RN to BSN to MSN track, but may choose to remain in the RN to BSN track.
6. Prior to taking NURS 500 Research (3 c.h.), the student must successfully complete an undergraduate statistics course with a grade of C or above.
7. Progression to the MSN program following BSN completion is dependent upon earning a grade of B- or higher in all graduate courses.
8. Students earning a C or below in 500-level courses are no longer eligible to continue in the RN to BSN to MSN track, but will be eligible for a BSN degree when all requirements are met.
9. Students in the RN to BSN to MSN track must maintain a GPA of 3.0 or higher. RN to BSN to MSN track students with GPA's between 2.0 and 2.9 will admitted on caution, but should maintain a current GPA of 3.0 or higher. If the student is unable to maintain this GPA, he or she may remain in the RN to BSN track if meeting RN to BSN progression policies.
10. The gate course in the RN-BSN program in NURS 492 Advanced Concepts of Nursing Practice (3 c.h.). This course must be completed prior to taking any 500 or 600 level nursing class, except for NURS 500 Research (3 c.h.) and NURS 503 Managing Population Health (3 c.h.).
11. NURS 220 Advanced Nursing Communication (3 c.h.) is the entry nursing course. Students will be informed that this is their chance to transfer to the dual degree, afterwards, the students will not be eligible to transition into the dual degree program.

12. UG pre-reqs should be completed by NURS 492 Advanced Concepts of Nursing Practice (3 c.h.).
13. MSN requirements will lead for admission and graduation.
14. After completing NURS 492 Advanced Concepts of Nursing Practice (3 c.h.), progression policies of the Graduate School apply.

Program Learning Outcomes
The student will be able to:

1. Design nursing curricula that reflects student learning needs, innovative teaching strategies, assessment and evaluation of learning outcomes that support a positive learning environment (NLN competencies 3 and 4).
2. Construct a learning environment based on educational theory and evidence-based practice which promotes individual learner needs (NLN competency 1).
3. Demonstrated the knowledge, skills, and abilities in creating a learning environment that supports individual goals and diverse student needs (NLN competency 2).

Nursing Administration Concentration
The student will be able to:

1. Demonstrate consultation and collaboration with interdisciplinary teams to direct health care systems delivery of nursing services and professional practice (ANA-Admin. 5c, 11, 10).
2. Provide health care systems management utilizing the nursing process to perform strategic planning, fiscal and resource management and evaluation of outcomes (ANA-Admin. 1-6, 14).
3. Utilize evidence to create a culture of safety and quality based on nursing values, advocacy, current nursing practice, legal ethical and regulatory compliance (ANA-Admin. 7, 8, 9, 12).

Nurse Educator Concentration
The student will be able to:

1. Design nursing informatics solutions to reach a community need, resolve a healthcare issue, or improve an outcome in the healthcare setting (ANA-Nursing Inform. 1,4,5)
2. Collaborate with key stakeholders in the healthcare setting to create strategies for informatics solutions (ANA-Nursing Inform. 6, 11, 13).
3. Synthesize available data, information, evidence, and knowledge to create a culture of safety and quality based on legal, ethical, and regulatory compliance (ANA-Nursing Inform. 1, 7, 10, 15).

Graduation Requirements for RN-BSN-MSN
1. Complete 151 hours.
2. 120 Credit hours must be 100-400 level courses (NURS 500 Research (3 c.h.) & NURS 503 Managing Population Health (3 c.h.) included)
3. 3.0 GPA
4. 30 credit hours of undergraduate courses must be upper-level (300-400 level)
5. Grade of ‘C’ minimum required for all undergraduate courses in the major
6. Grade of ‘B’ or higher required for all graduate courses
7. 46% of the undergraduate courses in majors must be taken through Liberty University
8. 30 credit hours of undergraduate courses must be taken through Liberty University
9. Coursework taken through Liberty University and is more than 5 years old may not be applied towards this degree. Students are required to repeat the course if it has exceeded the age limit.
10. Degree must be completed within 5 years.

Nursing Major (B.S.N.)

Program Learning Outcomes

The student will be able to:

1. View nursing as a ministry of demonstrating Christ’s love to hurting people of all religions, creeds, and cultures.
2. Provide and coordinate nursing care for individuals, families and groups within the community.
3. Utilize critical thinking/problem solving skills/evidenced base practice in determining nursing interventions and applying therapeutic skills.
4. Demonstrate leadership skills in collaboration with clients, other professionals and groups within the community for the purpose of promoting, maintaining, and restoring health.
5. Apply a personal and professional Christian value system, based on biblical principles, to ethical issues related to the practice of professional nursing.
6. Value the need for ongoing personal and professional development through both formal and informal learning experiences.
7. Foster professional level competencies in writing and communication and computer literacy.

Accreditation and Licensure

The bachelor of science in nursing program, at Liberty University School of Nursing is accredited by the

Commission on Collegiate Nursing Education
655 K Street, NW, Suite 750
Washington, DC 20001
(202) 887-6791

This degree is approved by the Virginia State Board of Nursing.

Application to the School of Nursing

A prospective student applies for candidacy to the nursing major when all prerequisite classes have been successfully completed or are in progress. Applicants are considered for candidacy to the nursing major following enrollment and successful completion of the following courses:

A personal interview with a nursing faculty member may also be required. The faculty reserves the right to refuse admission into the program. Acceptance by Liberty University does not guarantee acceptance into the nursing major.

Retention and Progression

Policies related to retention and progression are outlined in the annual Liberty University Nursing Student Handbook.

Clinical Prerequisites

Each student must secure uniforms, name pin, stethoscope, immunizations, urine drug screen, background check, and current CPR certification prior to the first clinical experience.

Transportation

Nursing students are responsible for transportation to and from clinical settings. Car pools are encouraged as a means of defraying transportation costs for the individual student.
Physical Examination
A physical examination including a urine drug screen, TB test, Rubella Titer, documentation of Hepatitis B vaccinations, and all childhood immunizations is required prior to the first day of class.

Accelerated Program
An accelerated summer program is available for students who have already completed one to two years of college work before deciding to enter the nursing major. Students who meet the admission criteria can finish the nursing requirements in two years.

Certificate Programs
Senior level students have an opportunity to specialize in a specific field of nursing by participating in one of two certificate programs:

• Critical Care Nursing (Adult and Maternal/Child tracks)
• Cross Cultural Nursing

Selected students complete extra classes and clinical experiences so that they are able to enter the workplace with a broader knowledge base and more highly developed clinical skills than other new graduates.

Advanced Placement
Registered nurses and licensed practical nurses may obtain advanced placement by applying to the RN track of the program. A registered nurse student is a nurse who:

1. Has graduated from an accredited program leading to an associate’s degree or a hospital diploma;
2. Had three months of nursing practice as a registered nurse within the past five years or completion of a refresher course before the senior year; and
3. Has been admitted to Liberty University.

NURS 101 Introduction to Nursing  1 Credit Hour

This course focuses on an introduction to nursing education, nursing process, principles of teaching and learning, the current roles of nurses in health care as well as the historical, ethical, political, social and legal aspects of nursing. This information is related to the curriculum requirements and career opportunities in nursing. Content also includes an introduction to Benner's model and nursing as a ministry.

Offered: Resident

NURS 104 Introduction to Nursing and Medical Terminology  3 Credit Hours

Offered: Online

NURS 105 Medical Terminology  1 Credit Hour

This course provides basic understanding of medical terms and abbreviations. Includes study of prefixes, suffixes, word stems, and technical terms with emphasis on proper spelling, pronunciation and applications. Elementary aspects of the nursing process with special emphasis on assessment are incorporated.

NURS 115 Sciences in Nursing  3 Credit Hours

Prerequisites: BIOL 213 and BIOL 214

The focus of this course is on physiological changes resulting from imbalances in the man-environment interaction throughout the life span. The emphasis is on application of general concepts of adaptation and homeostasis to each of the body's systems and on relationship of these concepts to the practice of clinical nursing. The course provides the student with a scientific knowledge base applicable to the more advanced clinical practice of nursing. (Formerly NURS 215)

Offered: Resident

NURS 200 Nursing Process Application  2 Credit Hours

Prerequisites: Nursing Gate 1 with a score of 3

This course is designed to help students achieve success in the Liberty University Nursing Program. Students will learn and apply strategies for analyzing, evaluating, and researching information for clinical decision-making. Students will apply critical thinking constructs to develop and write nursing care plans and pathophysiologies for selected patients in case studies.

Registration Restrictions: Acceptance to Gate 1.

Offered: Resident

NURS 210 Health Assessment  3 Credit Hours

Prerequisites: NURS 010 (may be taken concurrently) and Nursing Gate 1 with a score of 3

This course focuses on the development of a body systems approach to health assessment of individuals emphasizing normal growth and developmental responses across the lifespan. Content includes an introduction to the knowledge and skills of health assessment through a variety of methodologies in the classroom, opportunities to practice skills in the nursing laboratory and experiences in the clinical settings. Students apply communication techniques in eliciting comprehensive health histories and perform physical examinations in evaluating health status. NURS 210 is offered both as an online course and as an intensive held on the Liberty University Campus.

Registration Restrictions: Acceptance to Gate 1.

NURS 215 Pathophysiology  3 Credit Hours

Prerequisites: NURS 220 or NURS 350

The focus of this course is on physiological changes resulting from imbalances in the man-environment interaction throughout the life span. The emphasis is on application of general concepts of adaptation and homeostasis to each of the body's systems and on relationship of these concepts to the practice of clinical nursing. The course provides the student with a scientific knowledge base applicable to the more advanced clinical practice of nursing. Registration Restrictions: RN License in good standing.

NURS 220 Advanced Nursing Communication  3 Credit Hours

Prerequisites: Nursing Gate 1 with a score of 3

It is essential that professional nurses have communication skills that are effective in promoting optimal interaction with others in a variety of situations. This course focuses on developing expert communications skills when communicating with other health care providers and patients and when communicating professional information through writing and speaking. (Formerly NURS 350)

Registration Restrictions: Resident - Acceptance to Gate 1, continuance in the School of Nursing curriculum Online - RN Licensure in good standing.

NURS 221 Fundamentals in Nursing  4 Credit Hours

Prerequisites: NURS 200 and NURS 210 and NURS 021 (may be taken concurrently) and Nursing Gate 1 with a score of 3

This course focuses on the provision of safe and effective care related to common nursing technologies and the basic time and self-management as well as concepts regarding the establishment of effective communication skills, adaptation techniques, patient teaching techniques and specific age related considerations in the provision of nursing care are also discussed. The nursing laboratory, acute and long-term care settings provide the opportunity for the development of basic skills including medications.

NURS 301 Strategies for Adult Health Care I 5 Credit Hours
Prerequisites: NURS 200 and NURS 221 and NURS 225 and NURS 031 (may be taken concurrently)

In-depth exploration of bodily system dysfunction throughout the adult lifespan provides the focus of this course. Principles of pre-, intra-, and post-operative management, infection and wound management will be discussed. Discussions of dysfunctions of the respiratory, cardiac, vascular, hematologic, gastrointestinal, genitourinary and endocrine systems will also be included in the course content. With each topic covered, principles of care designed to most effectively maintain or restore homeostatic mechanisms are addressed. Aspects of patient teaching and discharge planning are incorporated into each system. Assessment, analysis, planning, implementation and evaluation are emphasized as the nursing process is applied to the clinical learning experience in the acute care setting. Legal, ethical, political and economical issues are addressed in the theoretical and clinical components of the course. The student will be responsible for the management of self and one client in the clinical setting.

Nursing Major (R.N. to B.S.N.)

Purpose

The purpose of the Liberty University School of Nursing is to prepare baccalaureate level nurses who are committed to Christian ethical standards and view nursing as a ministry of caring based on the Benner theoretical framework. The nursing curriculum is built upon a foundation from the arts, sciences, and the Bible, and focuses on the use of the nursing process to guide the acquisition of nursing knowledge, build strong clinical skills, and develop the foundation necessary for a sound work ethic.

Accreditation and Licensure

The bachelor of science in nursing degree at Liberty University is accredited by the Commission on Collegiate Nursing Education.

The School of Nursing is approved by the Virginia State Board of Nursing.

Program Specific Admission Procedures

• All policies and procedures as stated in the current Liberty University Catalog apply unless otherwise stated.

• Students who are admitted into the RN to BSN program must first meet certain prerequisites before they may begin registration for nursing classes. Admission requirements are listed below.
  • Liberty University Online Application
  • RN licensure in state of residence (copy of licensure document)
    • Active and current
  • Students must have earned a diploma or an Associate Degree in Nursing through an NLN/ACEN or CCNE accredited nursing program.
  • Must be a graduate of a NLN Accredited nursing program leading to an associate degree or hospital diploma.
  • Ability to meet essential attributes requirements

Upon acceptance into the program and United States RN licensure verification, 39 hours of advanced credit will automatically be applied toward students’ Bachelor of Science in Nursing. See the RN to BSN degree plan for additional course information.

Program Learning Outcomes

The student will be able to:

1. View nursing as a ministry of demonstrating Christ’s love to hurting people of all religions, creeds, and cultures;
2. Provide and coordinate nursing care for individuals, families and groups within the community;
3. Utilize critical thinking/problem solving skills in determining nursing interventions and applying therapeutic skills;
4. Demonstrate leadership skills in collaboration with clients, other professionals and groups within the community for the purpose of promoting, maintaining, and restoring health;
5. Apply a personal and professional Christian value system, based on biblical principles, to ethical issues related to the practice of professional nursing; and
6. Value the need for ongoing personal and professional development through both formal and informal learning experiences.
7. Foster professional level competencies in writing, oral communication, and computer literacy.
