

ACCOUNTING & DATA ANALYSIS MAJOR (B.S.)

Purpose

Liberty University's accounting program prepares students to be effective leaders in business. The program develops the proficiency in communication and computer application skills needed to work with complex accounting issues. Students also learn to identify, analyze and appropriately deal with ethical dilemmas from a sound moral and biblical perspective.

Program Learning Outcomes

The student will be able to:

- Analyze business transactions using the standards and guidance of accounting and auditing governing bodies.
- Apply appropriate technology and data analysis for the accounting discipline.
- Integrate accounting principles and the use of data analysis from a biblical perspective.
