# **BIOPSYCHOLOGY MAJOR** (B.S.)

#### **Purpose**

The Bachelor of Science in Biopsychology major is intended to give students preparation for medical or similar professional schools, graduate studies, and employment in the cross-disciplinary field of biopsychology. Students are immersed in hands-on, practical experiences in laboratories and lectures taught from the biblical worldview, such that they are well prepared to enter the workforce or pursue additional educational opportunities.

## **Program Learning Outcomes**

The student will be able to:

- · Apply standards and principles of safe practice in the laboratory.
- Understand ethical issues in the life sciences in light of a biblical/ Christian worldview.
- · Demonstrate knowledge of fundamental biopsychological concepts.
- Conduct, analyze, and summarize biopsychological research.

# Programs of Study Delivery Format: Residential Only

· Biopsychology (B.S.) - Resident
