

HOMELAND SECURITY AND DISASTER MANAGEMENT MAJOR (B.S.)

Purpose

The Bachelor of Science in Homeland Security and Disaster Management prepares undergraduate students to serve and lead in critical roles across federal, state, and local agencies, nonprofit organizations, and private sector entities involved in emergency preparedness and homeland security. Graduates will be equipped with practical, mission-driven solutions for complex threats, ranging from natural hazards to acts of terrorism, by applying interdisciplinary knowledge and cultivating leadership skills essential for community resilience and public safety. Integrating theoretical foundations with hands-on experience, the curriculum is rooted in Christian worldview.

Program Learning Outcomes

The student will be able to:

- Explain the principles of United States homeland security and disaster management.
- Apply risk assessment strategies to address hazards.
- Evaluate plans in accordance with legal and professional standards.
- Examine interagency coordination and communication processes.
- Apply a biblical worldview to ethical decision-making and leadership practices.
